

Tailored Legal Expertise for Life Sciences and Healthcare

We understand the highly regulated nature of the life sciences industry and have the expertise to guide you through its complexities. Our fully integrated law firm of specialised lawyers advises on European Union laws as well as local laws in Estonia, Latvia and Lithuania.

Our experts provide legal guidance to clients operating in various life science and healthcare industries:

- pharmaceuticals
- medical devices
- digital therapeutics (DTx)
- hospitals and healthcare providers
- cell, tissue and gene therapies
- biotechnology
- novel food and food supplements
- cosmetics
- veterinary care
- environmental agents

We offer comprehensive solutions across these practice areas:

- regulatory
- market access and reimbursement
- clinical trials, research and development
- commercial relations
- intellectual property
- data protection and cybersecurity
- litigation and dispute resolution
- mergers and acquisitions
- competition law
- governmental relations
- employment law
- real estate and construction
- tax advisory
- environmental, social and governance

Latvia

Ieva Andersone
Partner, Co-head of Life
Sciences & Healthcare

Marika Grunte
Senior associate

Lithuania

Daivis Švirinas
Partner

Dovydas Gudžiunas
Senior associate

Our experience includes:

Global advisory for the manufacturers of a medical device software (MDSW) for distribution in different countries around the world (including EU Member States and the USA). We are advising companies from the perspective of EU laws (including the AI Act).

We have extensive experience of pharmaceutical litigation. We represent clients during patent disputes and litigation concerning regulatory protection and marketing authorisations and provide strategic advice on litigation strategies.

Full-scope legal advisory on a wide range of transactions, including licensing and collaboration transactions, standard merger and acquisition deals, and supply and distribution agreements. We advise our clients during all transaction stages, including conducting legal due diligence (as well as conducting separate intellectual property or data audits), negotiating and preparing transaction documents, and providing support on closing matters.

We stay closely connected to our clients by actively participating in leading life sciences and healthcare associations and organisations, such as local associations of pharmaceutical manufacturers, various associations of health technology entrepreneurs, and healthcare committees.
